

**What is claimed is:**

1. A shaving razor comprising
  - a housing having a primary guard at a front of said housing and a primary cap at an upper surface at a back of said housing, one or more primary shaving blades between said primary guard and said primary cap,
  - a trimming blade mounted at the back of said housing having a trimming blade cutting edge oriented away from said upper surface, and
  - an elongated handle having a first end secured to said housing,
  - said handle having a curve at said first end that is concave on the same side as said primary blades.
2. A shaving razor comprising
  - a housing having a primary guard at a front of said housing and a primary cap at an upper surface at a back of said housing, one or more primary shaving blades between said primary guard and said primary cap,
  - a trimming blade mounted at the back of said housing having a trimming blade cutting edge oriented away from said upper surface, and
  - an elongated handle having a first end secured to said housing,
  - said handle having a finger pad at said first end on the same side as said primary blades.
3. A shaving razor comprising
  - a housing having a primary guard at a front of said housing and a primary cap at an upper surface at a back of said housing, one or more primary shaving blades between said primary guard and said primary cap,
  - a trimming blade mounted at the back of said housing having a trimming blade cutting edge oriented away from said upper surface, and
  - an elongated handle having a first end secured to said housing,

said handle being bifurcated at said first end into two portions such that there is a region between said two portions.

4. The shaving razor of claim 1 wherein said handle has a finger pad at said first end on the same side as said primary blades.
5. The shaving razor of claim 3 wherein said handle has a finger pad at said first end on the same side as said primary blades.
6. The shaving razor of claim 1 wherein said handle is bifurcated at said first end into two portions such that there is a region between said two portions.
7. The shaving razor of claim 2, 4 or 5 wherein said finger pad is made of elastomeric material.
8. The shaving razor of claim 2, 4 or 5 wherein said handle has relieved portions providing access to said finger pad.
9. The shaving razor of claim 1, 2 or 3 wherein there are three or more said primary shaving blades.
10. The shaving razor of claim 1, 2 or 3 wherein there are four or more said primary shaving blades.
11. The shaving razor of claim 1, 2 or 3 wherein there are five or more said primary shaving blades.
12. The shaving razor of claim 1, 2 or 3 wherein said housing is pivotally connected to said handle by a connection that has an at rest stop position to prevent pivoting of said housing when the trimming blade is cutting hair.
